

Surgical PR Bounty Tracker

Generated: 2026-01-10

Methodology

Surgical PRs = Small, focused, template-based changes - < 100 lines of code - 1-3 files max - Follow existing patterns - Low competition (0-2 comments)

Tier 1: Template-Based (\$50-100) - BEST FOR SURGICAL archestra-ai/archestra - LLM Provider Integration

Each follows same template. Check docs: <https://archestra.ai/docs/platform-adding-llm-providers>

Issue	Amount	Provider	Competition
#1856	\$50	Groq	Has PR
#1855	\$50	MiniMax	Has PR
#1854	\$50	Perplexity	Has PR
#1853	\$50	Cerebras	Has PR
#1852	\$100	Cohere	Has PR
#1851	\$50	Z.ai (Zhipu)	Has PR
#1850	\$50	x.ai (Grok)	Has PR
#1849	\$50	Mistral	Has PR
#1846	\$50	DeepSeek	Has PR

Strategy: PRs exist but may not be merged. Check PR quality, improve if needed.

Tier 2: Environment/Config Tasks (\$50-200)

PrimeIntellect-ai/prime-environments

Adding test environments for AI evaluation.

Issue	Task	Complexity
#467	Add polars_env	Small
#450	Pandas Software Eval	Medium
#435	UCI Prediction	Small
#432	Add UBench	Small
#423	MongoDB MCP env	Medium
#417	Next.js	Medium
#380	OpenbookQA env	Small
#360	Exa MCP web search	Medium
#355	Torch ao search	Medium
#354	Codex CLI search	Medium
#352	Next.js codebase search	Medium

Tier 3: High Value (\$1,500) - Larger but well-defined

tenstorrent/tt-metal - Model Bring-ups

Each is a model integration using TTNN APIs.

Issue	Model	Type
#32143	MoLE	ML
#32142	Granite Timeseries	ML
#32140	Time Series Transformer	ML
#32139	PatchTST	ML
#32138	PatchTSMixer	ML
#32137	Informer	ML
#32069	Bark Small (Audio)	Audio
#32068	Higgs Audio v2	Audio
#32064	Llasa-3B	LLM
#31290	DPT-Large	Vision
#31289	MonoDiffusion	Vision
#31286	Depth-Anything-V2	Vision

Note: These require ML expertise and Tenstorrent hardware knowledge.

Tier 4: Documentation/Tutorial (\$50-200)

midnightntwrk/contributor-hub

Midnight blockchain tutorials and videos.

Issue	Type	Topic
#237	Tutorial	Private AMM
#236	Video	DEX Order Book
#233	Video	Private voting
#232	Tutorial	Private state
#231	Video	ZK Proofs intro
#230	Tutorial	Dev environment
#229	Tutorial	Private NFT Marketplace
#228	Tutorial	Decentralized Identity
#227	Tutorial	AI inference + proofs
#226	Tutorial	Storage solutions

Tier 5: Web3/DeFi Agents

daydreamsai/agent-bounties

Building DeFi monitoring agents.

Issue	Agent	Function
#10	Bridge Route Pinger	Monitor bridges
#9	Lending Liquidation Sentinel	Liquidation alerts

Issue	Agent	Function
#8	Perps Funding Pulse	Funding rate monitor
#7	LP Impermanent Loss	IL calculator
#6	Yield Pool Watcher	APY tracking
#5	Approval Risk Auditor	Token approval risks
#4	GasRoute Oracle	Gas optimization
#3	Slippage Sentinel	Slippage alerts
#2	Cross DEX Arbitrage	Arb opportunities
#1	Fresh Markets Watch	New market scanner

Quick Wins (0 comments, simple)

Repo	Issue	Task
cortexlinux/cortex	#441	CUDA/cuDNN installer
cortexlinux/cortex	#164	Package dependency tree
cortexlinux/cortex	#163	Multi-version packages
cortexlinux/cortex	#154	Semantic version resolution
cortexlinux/cortex	#144	Package install profiles
cortexlinux/cortex	#143	System migration assistant
cortexlinux/cortex	#140	Install script generator
ubounty-app/ubounty-demo	#9	Test bounty (USDC)

Action Plan

1. **This week:** Fork archestra-ai, study their provider template
 2. **First PR:** Pick provider with weakest existing PR, do it better
 3. **Parallel:** Check daydreamsai agents - simpler scope
 4. **Document:** Each PR should be < 100 LOC, < 3 files
-

Stats

- Total bounty issues on GitHub: **2,759**
- Surgical opportunities identified: **~80**
- Estimated unclaimed value: **\$15,000+**
